Professional Summary

Final-year Information Technology student with hands-on experience in Java, Full Stack Development, Software Testing, and Database Management. Proficient in Java, Python, JavaScript, SQL, React.js, Node.js, REST APIs, and debugging through academic projects and internships. Seeking Software Development, QA, and Software Engineering opportunities.

Education

Amrutvahini College of Engineering, Sangamner
B.E. in Information Technology

Nov 2022 – Present
CGPA: 8.96 / 10

Technical Skills

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Frontend Technologies:** React.js, HTML5, CSS3, Tailwind CSS
- **Backend Technologies:** Node.js, Express.js
- **Database Connectivity:** JDBC
- **Databases:** MongoDB, MySQL
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, REST APIs, Software Testing Fundamentals, Debugging, Problem Solving
- **Tools & Platforms:** Git, GitHub, Postman, VS Code

Internship Experience

Zensar Technologies – Software Development Intern

December 2024 – January 2025

- Completed hands-on training in Java, JDBC, SQL, and backend application development.
- Developed a Java-based application integrating JDBC and MySQL for database connectivity and data management.
- Implemented CRUD operations and SQL queries to perform efficient data handling.
- Performed debugging and testing to identify and resolve application issues.
- Collaborated with peers on project development while following software development best practices.

Projects

Deepfake Audio Detection System

Python, MERN Stack, MongoDB

- Developed an AI-powered audio classification system to identify deepfake audio samples using machine learning techniques.
- Built backend APIs and integrated them with the web application for audio analysis and prediction.
- Managed secure data storage and communication using MongoDB and REST APIs.
- Performed model testing, validation, and debugging, achieving over 85% detection accuracy.

Agriculture Management System

Java, JDBC, MySQL

- Developed a Java-based application for managing farmers, crops, and agricultural records.
- Implemented CRUD operations using JDBC with MySQL database integration.
- Applied Object-Oriented Programming (OOP) principles to design maintainable application modules.
- Performed debugging, testing, and database query execution to ensure reliable system functionality.

Certifications

- Programming in Java – NPTEL
- Google Cybersecurity Professional Certificate – Coursera
- Java Full Stack Developer Virtual Internship – EduSkills
